

## Sorry, there is no peer review to display for this article

For research papers *BMJ Paediatrics Open* has fully open peer review. This means that accepted research papers usually have their prepublication history posted alongside them on [bmjpaedsopen.com](http://bmjpaedsopen.com).

This prepublication history comprises all previous versions of the manuscript, the reviewers' comments, and the authors' responses to all the comments from reviewers and editors. In rare instances we determine after careful consideration that we should not make certain portions of the prepublication record publicly available.

In all instances in which we have determined that elements of the prepublication record should not be made publicly available, we expect that authors will respect these decisions and also will not share this information.
