

BMJ Paediatrics Open

BMJ Paediatrics Open is committed to open peer review. As part of this commitment we make the peer review history of every article we publish publicly available.

When an article is published we post the peer reviewers' comments and the authors' responses online. We also post the versions of the paper that were used during peer review. These are the versions that the peer review comments apply to.

The versions of the paper that follow are the versions that were submitted during the peer review process. They are not the versions of record or the final published versions. They should not be cited or distributed as the published version of this manuscript.

BMJ Paediatrics Open is an open access journal and the full, final, typeset and author-corrected version of record of the manuscript is available on our site with no access controls, subscription charges or pay-per-view fees (<http://bmjpaedsopen.bmj.com>).

If you have any questions on BMJ Paediatrics Open's open peer review process please email info.bmjpo@bmj.com

I, the Submitting Author has the right to grant and does grant on behalf of all authors of the Work (as defined in the below author licence), an exclusive licence and/or a non-exclusive licence for contributions from authors who are: i) UK Crown employees; ii) where BMJ has agreed a CC-BY licence shall apply, and/or iii) in accordance with the terms applicable for US Federal Government officers or employees acting as part of their official duties; on a worldwide, perpetual, irrevocable, royalty-free basis to BMJ Publishing Group Ltd ("BMJ") its licensees and where the relevant Journal is co-owned by BMJ to the co-owners of the Journal, to publish the Work in this journal and any other BMJ products and to exploit all rights, as set out in our [licence](#).

The Submitting Author accepts and understands that any supply made under these terms is made by BMJ to the Submitting Author unless you are acting as an employee on behalf of your employer or a postgraduate student of an affiliated institution which is paying any applicable article publishing charge ("APC") for Open Access articles. Where the Submitting Author wishes to make the Work available on an Open Access basis (and intends to pay the relevant APC), the terms of reuse of such Open Access shall be governed by a Creative Commons licence – details of these licences and which [Creative Commons](#) licence will apply to this Work are set out in our licence referred to above.

Other than as permitted in any relevant BMJ Author's Self Archiving Policies, I confirm this Work has not been accepted for publication elsewhere, is not being considered for publication elsewhere and does not duplicate material already published. I confirm all authors consent to publication of this Work and authorise the granting of this licence.

The Benefits of Online Healthcare If One Has a Disability

As a teenager with Cerebral Palsy I often found that I had few people around to relate to. At this age we want to connect with people who see the world from our own viewpoint, so I started to connect with people online via charities and I had a special connection with CP Teens UK.

Being involved with CP Teens UK and connecting with other disabled people, locally, nationally and recently internationally via online communities has really helped my confidence and changed my perception of my disability for the better. I really wanted an opportunity to share that sense of community and purpose with others so now I am an ambassador for CP Teens UK, this involves co-hosting events and writing regular guest blog for them.

Having the help and support of CP Teens UK and the wider disabled online community has enabled me to be where I am today. A student at Sheffield Hallam University studying a BSc(hons) degree in Occupational Therapy.

Although it's important to say that many people have missed vital face to face contact, some disabled people have found that online appointments have been a reevaluation and suited with their complex needs much more. This is because at times going to appointments can be quite stressful for a disabled person and can result in a lot of fatigue. As someone who has attended a lot of appointment in my life, I can say that there have been many times that I've been travelling much longer than the appointment itself.

To attend a face to face appointment an enormous amount of energy and effort is required, when I was younger the preparation for the appointment would cause both physical and mental strain as that 1-hour appointment could take up to 3 & 4 hours. Getting up, getting ready, travelling there and back as well as the appointment itself is exhausting, physically and mentally, not to mention the transport and costs. On multiple occasions there have been times where I have not had the energy to go back to school and carry on with my day. If some of these appointments had been online, I would have had a lot more energy to go about my normal day.

I am aware that face to face contact cannot be replaced completely, and not every appointment can be done online. I would like to think that if I was under a professional's care for a long period of time at some point, I would like the opportunity to physically meet them. I am also aware that even in the 21st century technology has its flaws and is not always 100% reliable. I have spent most of my life working on a computer and I still stumble.

Over the years I have had many hands-on appointments with physio's and occupational therapists that would not have worked virtually online. For example, they would not have been able to get a feel of how my muscles work and an online wheelchair assessment or kitchen assessment certainly would not have gone well.

1
2
3 However, we need to take this opportunity to be person centred, and explore if the
4 option of virtual appointments could be offered for some appointments. If I had been
5 given the choice I would have leapt at an online appointment as it would have fitted
6 in with my busy life a lot easier, and would have left me with the energy to continue
7 with my day.
8
9

10 I believe that health care professionals should give young people the **option** of a
11 virtual appointments if possible, as choice and control are incredibly
12 important, and provide more opportunities for people with complex needs to make
13 their own decisions over their lives.
14

- 15
- 16 • Young people should be given the option of an online appointment.
- 17 • The disadvantages of an online appointment need to be discussed with the
- 18 young person.
- 19 • Recognition that a mixture of online and face to face appointments should be
- 20 an option for young people with a chronic illness.

4 As a teenager with Cerebral Palsy I often found that I had few people around to
5 relate to. At this age we want to connect with people who see the world from our own
6 viewpoint, so I started to connect with people online via charities and I had a special
7 connection with CP Teens UK.
8
9

10 Being involved with CP Teens UK and connecting with other disabled people, locally,
11 nationally and recently internationally via online communities has really helped
12 my confidence and changed my perception of my disability for the better. I really
13 wanted an opportunity to share that sense of community and purpose with others so
14 now I am an ambassador for CP Teens UK, this involves co-hosting events and
15 writing regular guest blog for them.
16
17
18

19 Having the help and support of CP Teens UK and the wider disabled online
20 community has enabled me to be where I am today (a student at Sheffield Hallam
21 University studying a BSc(hons) degree in Occupational Therapy).
22
23
24

25 Although it's important to say that many people have missed vital face to face
26 contact, some disabled people have found that online appointments have suited their
27 complex needs much more. This is because at times going to appointments can be
28 quite stressful for a disabled person and can result in a lot of fatigue. As someone
29 who has attended a lot of appointments in my life, I can say that there have
30 been many times that the time spent travelling was much longer than the
31 appointment itself.
32
33

34 To attend a face to face appointment an enormous amount of energy and effort is
35 required. When I was younger the preparation for the appointment would cause both
36 physical and mental strain as that 1-hour appointment could take up to 3 & 4
37 hours. Getting up, getting ready, travelling there and back as well as the appointment
38 itself is exhausting, physically and mentally, not to mention the transport and costs.
39 On multiple occasions there have been times where I have not had the energy to go
40 back to school and carry on with my day. If some of these appointments had been
41 online, I would have had a lot more energy to go about my normal day.
42
43

44 I am aware that face to face contact cannot be replaced completely, and not every
45 appointment can be done online. I would like to think that if I was under a
46 professional's care for a long period of time at some point, I would like the
47 opportunity to physically meet them. I am also aware that even in the 21st century
48 technology has its flaws and is not always 100% reliable. I have spent most of my life
49 working on a computer and I still stumble.
50
51

52 Over the years I have had many hands-on appointments with physiotherapists and
53 occupational therapists that would not have worked virtually online. For example,
54 they would not have been able to get a feel of how my muscles work and an online
55 wheelchair assessment or kitchen assessment certainly would not have gone well.
56
57

58 However, we need to take this opportunity to be person centred, and explore if the
59 option of virtual appointments could be offered for some appointments. If I had been
60

1
2
3 given the choice, I would have leapt at an online appointment as it would have fitted
4 in with my busy life a lot easier, and would have left me with the energy to continue
5 with my day.
6
7

8 I believe that health care professionals should give young people the **option** of a
9 virtual appointment if possible, as choice and control are incredibly
10 important, and provide more opportunities for people with complex needs to make
11 their own decisions over their lives.
12

13 **My suggestions**

- 14 • Young people should be given the option of an online appointment.
- 15 • The disadvantages of an online appointment need to be discussed with the
- 16 young person.
- 17 • Recognition that a mixture of online and face to face appointments should be
- 18 an option for young people with a chronic illness.
